Summary

- AI/ML Engineer with hands-on experience in Machine Learning, LLMs, and Agentic AI systems
- Skilled in building AI agents, RAG-based chatbots, and real-world ML models
- Strong in Python, data preprocessing, and end-to-end AI system design
- Passionate about developing intelligent, decision-making AI systems

EDUCATION

Christian Eminent College, Indore (DAVV University)

BCA (Bachelor of Computer Applications)

2024 – 2027

CGPA (First Year): 6.90

Project

Swiggy Delivery Time Prediction (Machine Learning)

- Built Machine Learning models using Random Forest and Linear Regression
- Performed data cleaning and feature engineering on 10,000+ records
- Achieved 90% prediction accuracy
- Tools: Python, Pandas, Scikit-learn, NumPy.

AI Voice Assistant (Agent-based)

- Built a voice-enabled AI assistant for real-time user interaction
- Implemented Speech-to-Text and Text-to-Speech for seamless communication
- Integrated LLM for intelligent responses and decision-making
- Enabled task execution using agent-based workflow (commands, queries)
- Tools: Python, SpeechRecognition / Whisper, TTS, LLM (LangChain/OpenAI)

AI Agent Mobile Finder Project

- Built an AI agent to recommend mobile phones based on user preferences (budget, features, brand)
- Implemented Thought → Action → Observation workflow with step-by-step tracing
- Integrated tool-calling for dynamic data fetching and filtering
- Developed conversational interface for personalized recommendations
- Tools: Python, LLM (LangChain/LangGraph), APIs

SKILLS

- Programming Languages: Python, SQL
- Machine Learning: Regression, Classification, Feature Engineering, Model Training, Model Evaluation, Data Preprocessing, Scikit-learn
- Deep Learning: TensorFlow, Keras, Convolutional Neural Networks, Neural Networks
- AI / LLM : LLMs, RAG, AI Agents, Vector Databases, Embeddings
- Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)
- Tools & Technologies: Git, GitHub, Jupyter Notebook, VS Code
